## *An Unprecedented Challenge!*

The Sogetsu BuxMont Study Group has never had any hand-on experience with designing the towering bamboo structure. It was the most demanding and yet the most rewarding experience ever facing the Study Group in its short existence.

With the concerted efforts of the Study Group's teacher, members and their spouses, we were very proud of presenting the bamboo structure titled "Emerging" at 2021 Philadelphia Flower Show. The replica of the structure is attached for your reference.
